

Access Panels For VL Series

The VL / VLX model air handlers are available with several access panel options. The RTU-1AS for the VL and the RTU-2AS for the VLX are louvered panels for front return applications. All RTU access panels have a frame for easy wall mounting installation.

Also available are the RFG-1AS for the VL and the RFG-2AS for the VLX. These are louvered panels, without a frame for mounting directly to the unit.

Another option is the lower coil panel. The models are the LCP-1AS for the VL and the LCP-2AS for the VLX. These are solid panels mounted to the unit for use in bottom return applications.

RTU-1AS

Access Panel Dimen-

Access Panel	Air Handler Model	Height	Width
RTU-1AS	VL18-30	41.75"	22.75"
RTU-2AS	VLX36*	44.75"	24.75"
RFG-1AS	VL18-30	38.00"	20.50"
RFG-2AS	VLX36*	41.50"	22.50"
LCP-1AS	VL18-30	18.00"	18.00"
LCP-2AS	VLX36-48	20.00"	20.00"

*Note: VLX42 and VLX48 are available in bottom return only, and require the lower coil panel.
